CIE 1: The Idea

- **The One-Line pitch:**

  An overlooked notice board of a college begins displaying hidden messages that a group of students notice, only to realise it predicts future events.

- **The Foraging Spree**

  1. **The Anatomy of Story**
     Author: John Truby
     Genre: Writing craft / storytelling guide
     Published: 2007

  This book helps develop the story by giving a method to expand a simple idea into a layered narrative. From my one-line pitch about a notice board predicting future events, Truby's approach helps in deciding what kind of characters would naturally exist in this situation and how they might clash with each other. It encourages thinking about oppositions, such as belief versus doubt or control versus innocence, which can shape the direction of the story. This helps enrich the idea by turning it into more than a mystery and instead making it about human behaviour and choices. The book is useful at this stage because it helps organise the idea into a clear story foundation before thinking about scenes or twists.

  2. **Directing the Story**
     Author: Francis Glebas

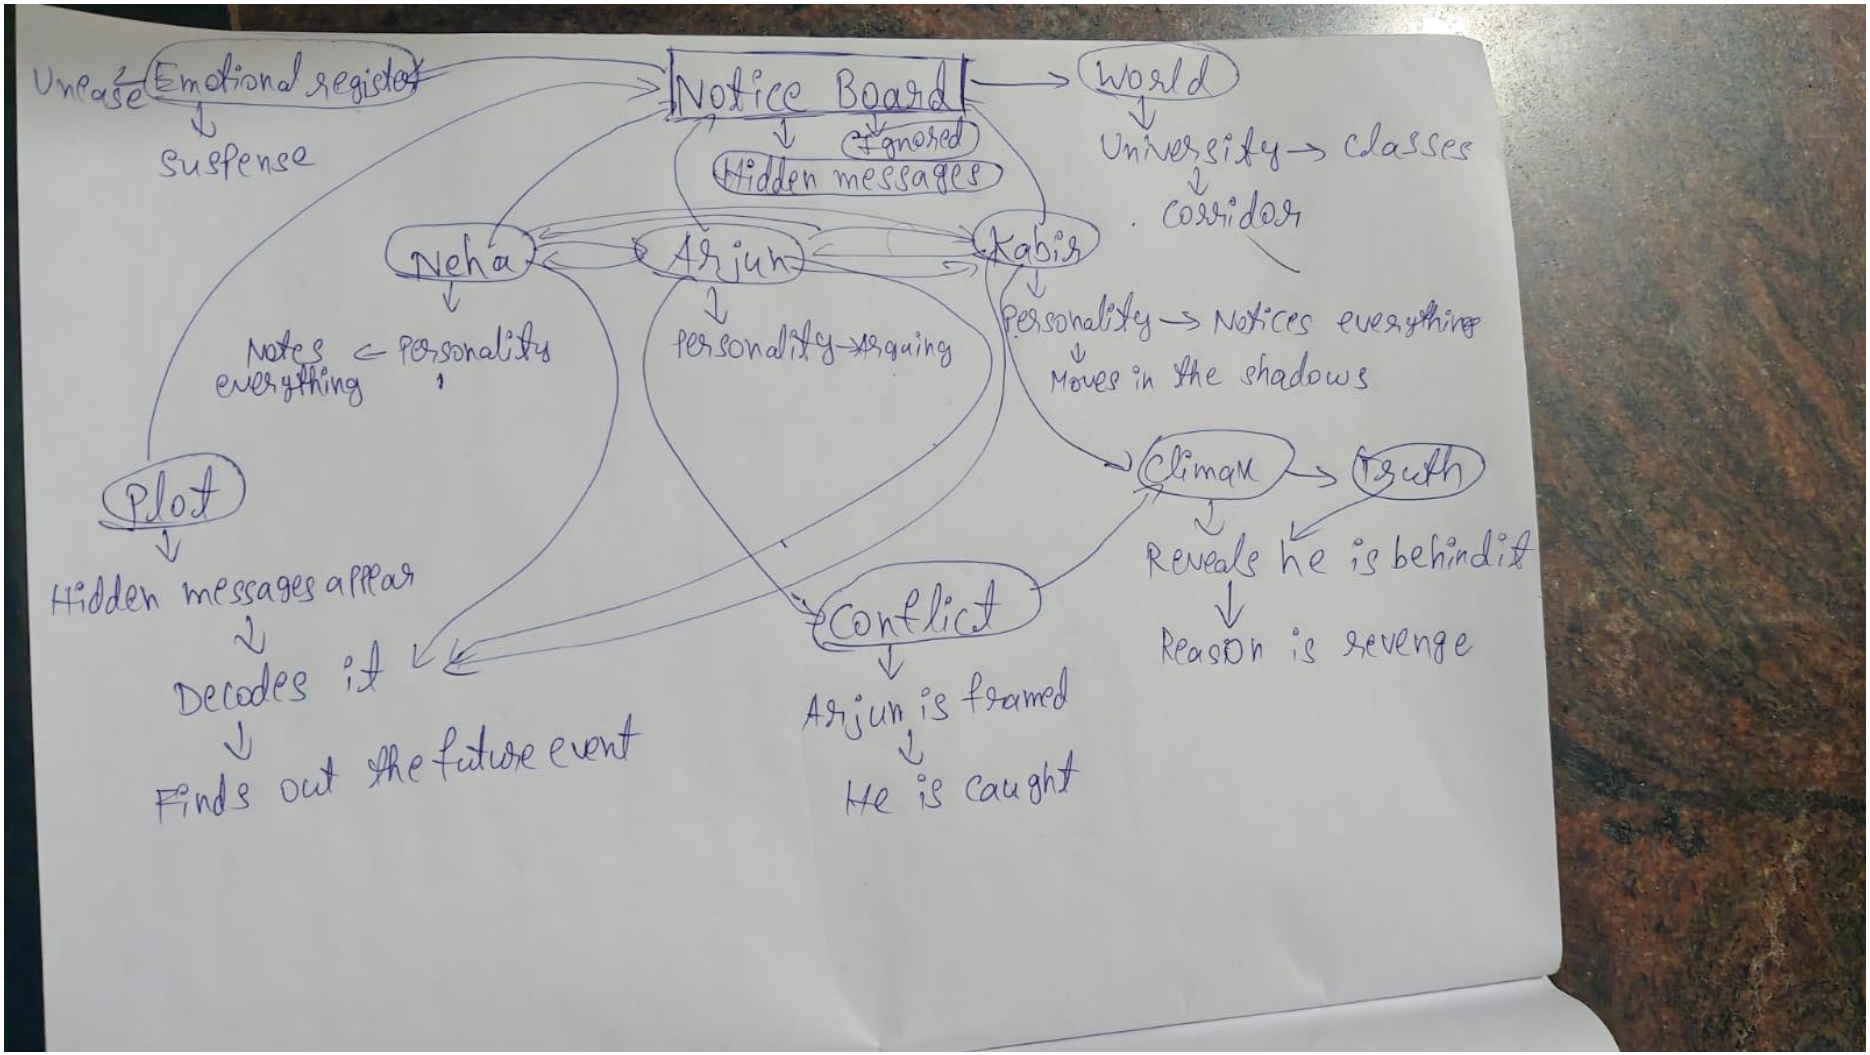
Genre: Non-fiction
Published: 2008

This book helps in developing *how* the story can be communicated rather than *what* the story is. Since the core idea involves an object silently influencing events, the book encourages visual storytelling from the beginning. It helps in imagining how repeated visuals, framing, and character movement can slowly reveal information to the audience. This enriches the story by allowing tension and meaning to come from what is seen instead of explained. At the pitch stage, this book is useful because it pushes me to think of the notice board as a visual element that drives the story forward, rather than relying on dialogue or exposition to explain its importance.

3. **The Suspense Thriller**
   Author: James N. Frey
   Genre: Writing craft / nonfiction
   Published: 1992

   This book helps develop the emotional experience of the story for the audience. From the one-line pitch, it provides guidance on how curiosity can turn into tension and eventually fear. Frey's ideas help in thinking about how the story should progress in terms of suspense, starting from normal situations and gradually becoming unsettling. This enriches the story by focusing on pacing and anticipation rather than immediate shocks. The book is especially helpful at an early stage because it helps plan how information should be revealed slowly, ensuring that the audience stays engaged and uneasy as the story unfolds.

- **The Mind Map**



Unease
Emotional register
suspense
Notice Board
Ignored
Hidden messages
World
University → classes
corridor
Neha
Arjun
Kabir
Notes everything ← personality
personality → arguing
personality → Notices everything
Moves in the shadows
